StarFish Windows 7 Theme

StarFish is a Windows theme. It is designed for the Windows 7 operating system. The theme sports a starfish pattern. You can use the stars as a background image on your desktop. The theme comes with many options to customize. The best way to install the theme is by using the built-in theme maker that is part of

Windows 7. Thank you so much for the very fast response and helping me install the theme correctly. I love the theme, it was easy to install and looks good. Thank you. Ankita Sharma • March 21, 2010 Hello, I just purchased the Starfish Win7 Theme. The file was a v1.zip and I downloaded the new v2.zip file and installed it. I downloaded the zip file twice, once from your website and again from the download link. Did it make a difference? bruce • March 20, 2010 Hi I just ordered a theme from you. The theme is beautiful! Thanks for creating such great themes. Willy • March 19, 2010 How do I install this theme? zap • March 17, 2010 Can I install this theme in Windows 7? Sandip • March 15, 2010 Hello... can I download this theme using Microsoft Windows Live ID?? John • March 13, 2010 A client wanted to install this theme on a laptop, but when she tried it in Windows 7, it was completely unreadable. So she asked me if I could fix it. She was told that it was a "compatible theme", but since the theme was not compatible with Windows 7, I was not able to fix it. I tried some of the fixes on my PC, but that didn't work. I did not find a fix for it. I'm hoping that you can help. Thanks for any help you can provide. sandeep • March 13, 2010 how to install theme in 7. t • March 10, 2010 i have a pc with windows 7 can u help me how to install theme in it wow! its so cool!
