It is the first time in franchise history that this process has been applied to FIFA on any level. For the first time, players cannot choose when to activate the super-speed in an attacking move. We are capturing players' natural acceleration patterns to ensure players feel totally connected to the game. Additionally, the "HyperMotion" engine delivers increased speed through the ball and players when compared to last year's FIFA. "We collected data from 2,100 minutes of high-intensity action from 22 players in motion capture suits, captured by nine cameras," said Patrice Lagisquet, senior gameplay engineer. "We then used some of this data to change the engine. It's a combination of new features and the action choices of players resulting in an overall improved player speed." To improve the connection with players, Lagisquet added that the team has: - Worked on dynamic camera paths, which enables players to feel more connected to their actions; - Included more refracted rays to improve viewing angles when players are not near the ball; - Worked on the ball physics and passing accuracy to increase ball speed. *** Here are several key new features in Fifa 22 Product Key: Football IQ Player Traits First Touch Traits Super Vision Match Player Traits Team Tactics Team Styles Coach AI Goalkeeper Play Goalkeeper Traits Save Shot Drop Point Save Swat Instinct Instinct Pace Instinct Depth Press Press Rate Press Tackles Player Traits Players will now have unique playing styles using new traits. Traits are unique features that will be bound to the player when selected. Traits offer players new ways to unlock new gameplay features such as running with the ball or shooting on the run. For example, GK players have the ability to use the save shot to blast a ball into the air and shoot to score, while a CB can run with the ball and shoot on the run at goal. Certain traits are assigned by the manager, coach or player. Players can unlock new traits by selecting different teams, playing in different leagues, or playing offline. New Player Traits include: PUP! - A new quick pass that allows players to release the ball
