Key Features: 🔲🔲🔲🔲🔲🔲🔲 Breathtaking Scenery Your first steps in a world inside a secret testing facility will take you through a series of isolated rooms. Explore the facility, unlock doors, and be very aware of the lurking shadows. Find anything you can pick up to make noise, to draw attention away from you. Remember, this can be an environment with you outgunned. You can't use a gun to clear a room, for instance, because you are already in a space where you shouldn't be. Move quickly, and stay low in the shadows. 🔲🔲🔲🔲🔲🔲🔲 Conjure Unreal Monsters You're tasked with reaching a secret vault hidden within the facility. It is a secure room that holds the keys to your freedom. Escape is only possible through an escape hatch, which is behind you at all times. Can you reach it? Find your way through the facility using every bit of your logic and senses. Outsmart your enemies as you make your way through the facility. Have you got what it takes to escape? Character Progression Survival is just the first step to unlocking the facility. When you escape the facility, the game will provide you with new tools and opportunities to unlock more areas, as well as more types of enemies. You must remain conscious of every step and be prepared to avoid a line of sight at all costs. Avoid getting spotted and do whatever you can to stay alive. 🔲🔲🔲🔲🔲🔲 Survivor Mode Features Your experience inside the secret facility has been recorded in a file and provided to you by our engineers. That file will be your only guide for the duration of your adventure. But don't be fooled into thinking this is a game of hide-and-seek.

This is survival horror. Only one of you will make it out alive. Make sure you have all the tools you need to protect yourself throughout your journey. Take every opportunity to keep that escape hatch open. Keep moving, keep quiet, keep your eyes open. Pay attention

Bonsai Castles is an independently-developed, massively multiplayer online role-playing game set on an island paradise, focusing on creative skill, a fantasy-based artistic style, and the development of community bonds. Players are cast as a warrior or a healer and play via the Bonsai Castles' proprietary client. Premise Players assume the role of a mythical entity known as a Hero and interact with each other through a number of virtual villages called Soils. A Soil is a communal living space, where all players within that village are granted access. They can either meet in person in the Bonsai Castle (the game's central area, accessed only by players with a Bonsai Castle Pass), or players can create their own Soil. Each player is granted a level, which ranges from 1 to 30 (a higher level grants one additional level after the first one). A level cap exists and players generally cannot increase their level past this by any means. Each player represents a new character(s) and players that have not yet created a character are given the chance to create one during game launch. To aid in the development of this "soul," a unique palette of skills is assigned to each character that powers different states of mind such as creativity, logic, and focus to name a few. In most Soils, players eventually complete a challenge known as a Castle Age to earn new abilities and eventually build defenses, as well as quest to earn both experience and money. In 2007, an "Adventure Time" clan was created. The clan, entitled "Adventure Time", released a highly successful 'merchant' server in which one could earn Adventure Time's "coins", a virtual currency. In 2008, the Adventure Time Coin Shop was created for mass distribution of Adventure Time coins. The city of "Adventure Time" was located on the North-East island of the tiny kingdom of "Nuun" which was located on the left border island of the village world map. From 2009 to the fall of 2011, Bonsai Castles also had a PvE clan called "Mystery Island", which dedicated itself to creating areas within the game environment. The very first center of

Mystery Island was "The Temple." The most recent center of Mystery Island was "The Jail." Post-dating edition In March 2010, the MMO was expanded with the release of Bonsai Castles: Dodgeball in addition to MegaMiner Update XL
