Product Description. AutoCAD DDC is the first Win32 based DDC tools for ACADLT and is designed for use with all Autodesk AutoCAD products. It can automatically generate an ACADLT file description for existing AutoCAD drawings, or can be used to generate completely new description files or properties files from scratch. AutoCAD DDC is a stand-alone application that does not require Autodesk AutoCAD to run, but comes with a full set of AutoCAD extensions to make use of its capabilities. AutoCAD DDC is a completely stand-alone file type descriptor for Autodesk's AutoCAD 2008-2016 (and earlier) products. Each AutoCAD file is composed of an XML file schema describing various aspects of its content, followed by a series of XML files describing elements and attributes present in the drawing, and a series of XML files describing the elements and attributes contained by the document. AutoCAD DDC is a fast and reliable tool to extract or generate (via XSLT) ACADLT files from AutoCAD drawings and other document sources: DRC (version 10.5), DWG (versions 8.6-9.1 and later), PDF, ASCII, XMI.
