What's new in Elden Ring:

The third title in the Azure Bonds series, *Azure Bonds of the Devils* takes on a new world and a new form. Being born as a new dragon, Weiss Schwarzer looks forward to making a lot of friends, and it's been okay until she meets Giovanni, a neighboring dragon. Since they're in neighboring habitats, and having never seen her kind before, they find themselves accidentally shipwrecked on the same island. The result of this is the equivalent of a school trip to a massive theme park, but the details of how this goes down are deeper than you'd normally find. Once everything is sorted, the two lands need to make some hard decisions, and they're more than willing to learn a bit about the human world from their new neighbors as well as search for more information about the other orbs.

For two huge new young adult titles, this is a lot of content, and Hidaka takes her time to translate the amount of content she delivers quite nicely. It's a lot like reading a sports novel that doesn't just add detail to the teams, but actually shows why these teams were good (and not so good). It doesn't help that she's doing revisions to the main titles and retaining a large catalog of additional information. Weiss especially gets fleshed out. She gets a backstory, but much more than that is given detail on how the events of her "shipwreck" complete. It also gives a look at how humans and other races are treated on this island, the process of making laws, dealing with different lifestyles, and oftentimes what's the reason. There are other events in this volume as well, from a bonus event to a sister character of Weiss, all told with the same detail and fun as the history.

There are three new artworks to the volume, appropriately sticking with the fiction of the story. The covers for both volumes are large and detailed, full of high-quality color, and the interiors are just as detailed in a black-and-white style, but with lots of differing shades. This was a very nice transition from the previous volume, and it was a good choice to do this. Characters look good, too, it'

I discovered that there were many kingdoms and a lot of things to explore. But when I wanted to explore, the map had changed and I could not find anything. I decided to go to the central town of the kingdom. I entered and found a lot of people with different characters. I chose one of them, and I was led to a field with many tribes of monsters. Of course, I decided to approach the field. I have no idea what is a monster. A huge creature with yellow hair and eyes appeared and I lost at once. So I went back to the town, and found that my character was disfigured. I noticed that I lost some parts of my body. Then the girl appeared in front of me, and said that I had been attacked by the creature. Then I went to the PC, and downloaded the game again. When I went into the game, I found that the center of the world was closed, and many players had entered the game from that point. A map was displayed, and I could see that another character was on the map. I went to the player, and discovered that this is another character, but the girl was identical. I played again, and found that the girl had the same appearance and name as before. I
