I have an array of objects of a class called "Image", that is: `Image[] images = { new Image() { //defaults }, new Image() { //defaults }, new Image() { //defaults } }`; These objects have the following two attributes: `public String title = "default"; public int [] order = { 0, 0, 0 };` //position in array How do I add a fourth element to the array, with a title of "test", and its position in the array as 1? Thanks.  
Edit: I tried adding the element like this: `images[3].title = "test";` This threw an error, so I am guessing I need to get the position of the element and set it then. For example, something like: `public int place = 0; public String title = "default"; public int[] order = { 0, 0, 0, 0}; ... images[3].place = 3; images[3`
