Clifton Strengthsfinder Access Code Crack

When I click on OK, the following error appears:
Resulting object is not a

record. Original error:
[Err] 00000 - "Resulting
object is not a record."

*Cause: An object was
retrieved through a
"class" accessor method,
and.Net did not find a set
accessor for a specific

property (RecordCoeff with Value). This usually happens when: A column with a "create by" constraint was not found.

*Action: Make sure the FK field in the database definition is spelled correctly,. *Result: 0 A: Still no solution but I tried a new approach. I think the problem lies in the code of the report action on the report. I made a

report by using subreport instead of query (of course in the same database). It works fine and I got the output I was looking for. I hope to have one day a chance to make it fully functional.
