Motorola-end-user-usb-driver-installation-52-0-32bit-msi

Motorola-end-user-usb-driver-installation-52-0-32bit-msi Motorola-end-user-usb-driver-installation-52-0-32bit-msi inskam-camera-driver-windows-7-8-10-32-bit-rar

This is the best driver for the "Brilliance 120 USB Host webcam" (model no. the drivers are for windows 7 (32 bit) The USB driver it uses isn't working with any OS

(the driver is from some ebay order) it is for windows 8Q: Cannot retrieve a fragment by name in android I'm trying to get a fragment (called my_fragment) from the activity by using its name. I need to do this because the user creates the

```
activity in a fragment. public void onClick (View view) { FragmentManager  
    fragmentManager = getFragmentManager(); FragmentTransaction  
    fragmentTransaction = fragmentManager.beginTransaction(); if  
    (fragmentManager.findFragmentByTag("my_fragment")!= null) {  
        fragmentManager.beginTransaction()  
        .remove(fragmentManager.findFragmentByTag("my_fragment")) .commit(); }  
        fragmentTransaction.replace(R.id.container, my_fragment);  
fragmentTransaction.commit(); } I've tried this for a couple of hours and I couldn't  
find the solution. I will appreciate your help! UPDATE: I tried to remove the last  
commit and it ended up adding null to the container, I commented the new  
transaction for testing purposes, and it turned out there's a null pointer on that line  
(fragmentTransaction.replace(R.id.container, my_fragment);). I'm not sure why this  
is the case. A: To access fragments, you need to use this instead:  
getFragmentManager().findFragmentByTag("my_fragment"); Q c6a93da74d
